

G N BHUVANESHWARAN

ASPIRING AI/ML ENGINEER & DATA ANALYST

CONTACT

-  8778526207
-  bhuvaneshwarangn@gmail.com
-  <https://n-bhuvan.github.io/portfolio-website/>
-  Plot no.33,TSN Avenue,K.K.Nagar,Trichy-620007,Tamilnadu,India

TECHNICAL SKILLS

Programming Languages:

- Java • Python • C • C++ • Haskell • HTML • CSS • JavaScript

AI/ML & Analytics:

- Machine Learning Fundamentals • Retrieval-Augmented Generation (RAG) • Data Analysis & Analytics
- Pandas • NumPy • Predictive Modeling • Statistical Analysis

Data Visualization & BI Tools:

- Power BI • Tableau • Data Visualization Techniques • Dashboard Development

Tools & Technologies:

- Git • GitHub • VS Code • MySQL • Database Integration • Authentication Systems

Core Competencies:

- Problem-Solving • Analytical Thinking • Project Management • Technical Documentation

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

Amrita Vishwa Vidyapeetham

2024-2028

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Technical Certifications:

- AI Certification
- Python Certification
- Java Certification
- Data Analyst Certification
- Machine Learning Certification
- Power BI Certification
- Tableau Certification

PROFILE

Motivated and detail-oriented B.Tech Computer Science graduate with comprehensive expertise in AI/ML technologies, data analytics, and software development. Proven experience in developing intelligent systems including RAG-based AI solutions, machine learning prediction models, and data-driven applications. Skilled in multiple programming languages and advanced analytics tools with a strong foundation in database integration, authentication systems, and scalable technology solutions. Seeking to leverage technical expertise and analytical skills to drive innovation in AI/ML engineering and data analysis roles.

KEY PROJECTS

RAG-Based AI System

- Developed an advanced Retrieval-Augmented Generation system for intelligent information retrieval and AI-powered response generation
- Implemented AI/ML concepts, optimized retrieval workflows, and advanced data processing techniques
- Enhanced information accuracy and response quality through sophisticated retrieval mechanisms

Banking Management System

- Engineered a comprehensive Java-based banking application featuring account management, financial transactions, and balance tracking
- Integrated robust database operations with secure user authentication and authorization features
- Delivered seamless user experience with real-time transaction processing capabilities

Payroll Management System

- Built a full-stack payroll management solution for employee and salary administration
- Implemented automated attendance tracking, complex payroll calculations, and comprehensive database integration
- Streamlined HR processes through efficient data management and reporting functionalities

NVIDIA Growth Analysis (Exploratory Data Analysis)

- Conducted comprehensive EDA on NVIDIA growth data utilizing Python and advanced analytics libraries
- Performed data cleaning, trend analysis, and statistical modeling to extract actionable business insights
- Generated compelling data visualizations to communicate findings and support data-driven decision making

Machine Learning Prediction Project

- Developed end-to-end ML prediction model using Python, Pandas, and NumPy for data-driven forecasting
- Applied fundamental machine learning algorithms and statistical methods for predictive analytics
- Implemented data preprocessing, feature engineering, and model evaluation techniques

ACHIEVEMENTS & PROFESSIONAL ACTIVITIES

Ignite Workshop Participation

- Successfully participated in prestigious Ignite Workshop, presenting innovative entrepreneurial and business solutions to industry investors and professionals
- Demonstrated exceptional presentation skills, strategic problem-solving abilities, and entrepreneurial mindset through competitive idea pitching sessions
- Engaged in high-level discussions with industry experts, showcasing technical acumen and business innovation capabilities
